- **Singapore**: From 2<sup>nd</sup> March,2014to 10<sup>th</sup> March,2014

# Program learnings

- This initiative of providing Urban Transport Services through GUTSL was a 1<sup>st</sup> of its kind because previously there were only very small vehicle and auto rickshaw were plying wherein people were unable to even stand properly.
- As the demand for urban transport increases so too does the popularity of the Bus services. Production of this type of motorized has doubled between the years., it is responsible for a significant share of motorized trips. Strategies to improve urban transport must include a policy vision for this increasingly important sector. To that end, this program enlightened us about the role and need of promoting sustainable urban transport in my State. It develops a policy vision for this sector and presents recommendations on reforms to address sustainability challenges.
- However with the onset of City Bus Services people got relief from the ever prevailing problems of transportation. Now people are so acquainted with this service that they cant think of without this for a day. Now seeing the success story of City Bus Services in this cluster, Govt. is thinking of creating more such clusters .

## ■ ACHIEVEMENT

- The City Bus Services in the Brahmapur, Chatrapur, Gopalpur & Hinjilicut cluster is success story and has become the most dependable and affordable commutation by the general public.
- Now the situation is such if we procure any more number of Buses to add to the existing City Bus Services, it will further facilitate and strengthen the initiative taken up by the Govt. for the general public.
- The monopoly shown by the other ways of transportation is declined and people are really happy with the City Bus Services.
- A separate ring road was also done for the passage of the buses so that the regular transport within the city do not get effected with the buses.
